Claims 9-16 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: applicants' claimed invention includes, in all claims, "the decrypting information pieces are dispersively placed in the error correction data blocks in a manner such that one decrypting information piece is assigned to one error correction data block" while Furukawa et al. (EP 1020856) states "together with information of the session key embedded in the data block in the form of a separable noise" (Column 5, lines 5-6), i.e., Furukawa et al includes his decryption key as analog noise modulated upon the recorded data + ECC while applicant includes his decryption key as digital data dispersed among the data + ECC.
